Junior software engineer with interests in backend development and DevOps

Professional Summary

I am a 3rd Year Computer Science and Mathematics student at the University of the Western Cape (UWC) with experience in HPC, Linux, and backend development using Java and Spring Boot. I actively explore how data and cloud technologies drive innovation and am seeking a fintech or data driven internship to apply my technical skills to real world projects while expanding my expertise.

Technical Skills

Languages: Java (Strong), Python, JavaScript (Basic), Assembly

Frameworks/Tools: Spring Boot, Git, Linux (Kali, Ubuntu & Rocky), VS Code

Concepts: HPC (LINED), Virtualization, Data Structures, Cybersecurity, Web development & Automation.

Soft Skills & Communication

- Fast learner, curious, and self motivated.
- Strong problem solving mindset.
- Good Communication Skills
- Able to work effectively in a Team environment.

Passionate about engineering, cybersecurity, and building real world systems.

Education

University of the Western Cape:

- BSc Computer Science (4-year program)
- Expected Graduation: 2028

Courses outline:

- Data Structures, Operating Systems, Networking & Machine Learning
- Advanced Calculus and Linear Algebra

Projects & Expertise

- Designed and developed my own portfolio site (alphaprofile.netlify.app) using HTML, CSS, and JavaScript to showcase projects and skills.
- Built a system with Create, Read, Update, delete functionality, fetching and managing data from a database
- Developed the ability to apply Dynamic Programming, Object Oriented Programming (OOP) principles, and data structures concepts to practical coding challenges.
